**K-t-N Tip** Next time, the challenge will offer different questions, so come again and learn more!

## Learn The Internet.

### Take the Challenge!

Computers and Internet connections are revolutionizing the global economy and American education. The simple fact that you are ready to take the Dell Know-the-Net Challenge indicates that you recognize the importance of preparing your students, and yourself, for success in the digital world. At Dell, we believe you are the critical link between those who have prospered from the technology revolution and those who will be left behind due to lack of technology instruction and access.

We'd like to help you bridge that gap with the Teacher's Edition of Dell's Know-the-Net Challenge, an online tool designed to help you and your students understand and use the Internet to your benefit. When used to its fullest, the Internet can bring your educational instruction to life while simultaneously equipping your students with the skills they need to participate and prosper in the thriving Internet economy.

We should know. As an Internet pioneer, Dell rapidly built its business on the leadership of enthusiastic, tech savvy employees, all of whom use the Internet in their daily lives. The Web is so critical to our business that we developed a Know-the-Net Challenge to teach each member of the Dell team how to leverage the Internet, both professionally and personally. Internet proficiency is becoming a job requirement. We want to help you prepare your students for the opportunities that exist at companies like Dell and the thousands of fast-paced, technology-driven companies that are driving today's economy.

Through a series of sites and searches, Dell's Know-the-Net Challenge will introduce you to the Internet and help you understand the history and navigation of the Web. It opens up a wealth of teacher resources to connect you and your students to a variety of educational materials, fascinating locations, and teachers and students around the globe. At the end of the Dell KTN Challenge, you'll find many of these resources in a comprehensive list we've compiled for you to bookmark and keep. Take the Challenge before Nov. 30 and automatically enter the Dell Latitude Sweepstake for a chance to win a Dell Latitude notebook. No purchase or online entry necessary.
